

ILPMP & the Opioid Alternative Pilot Program

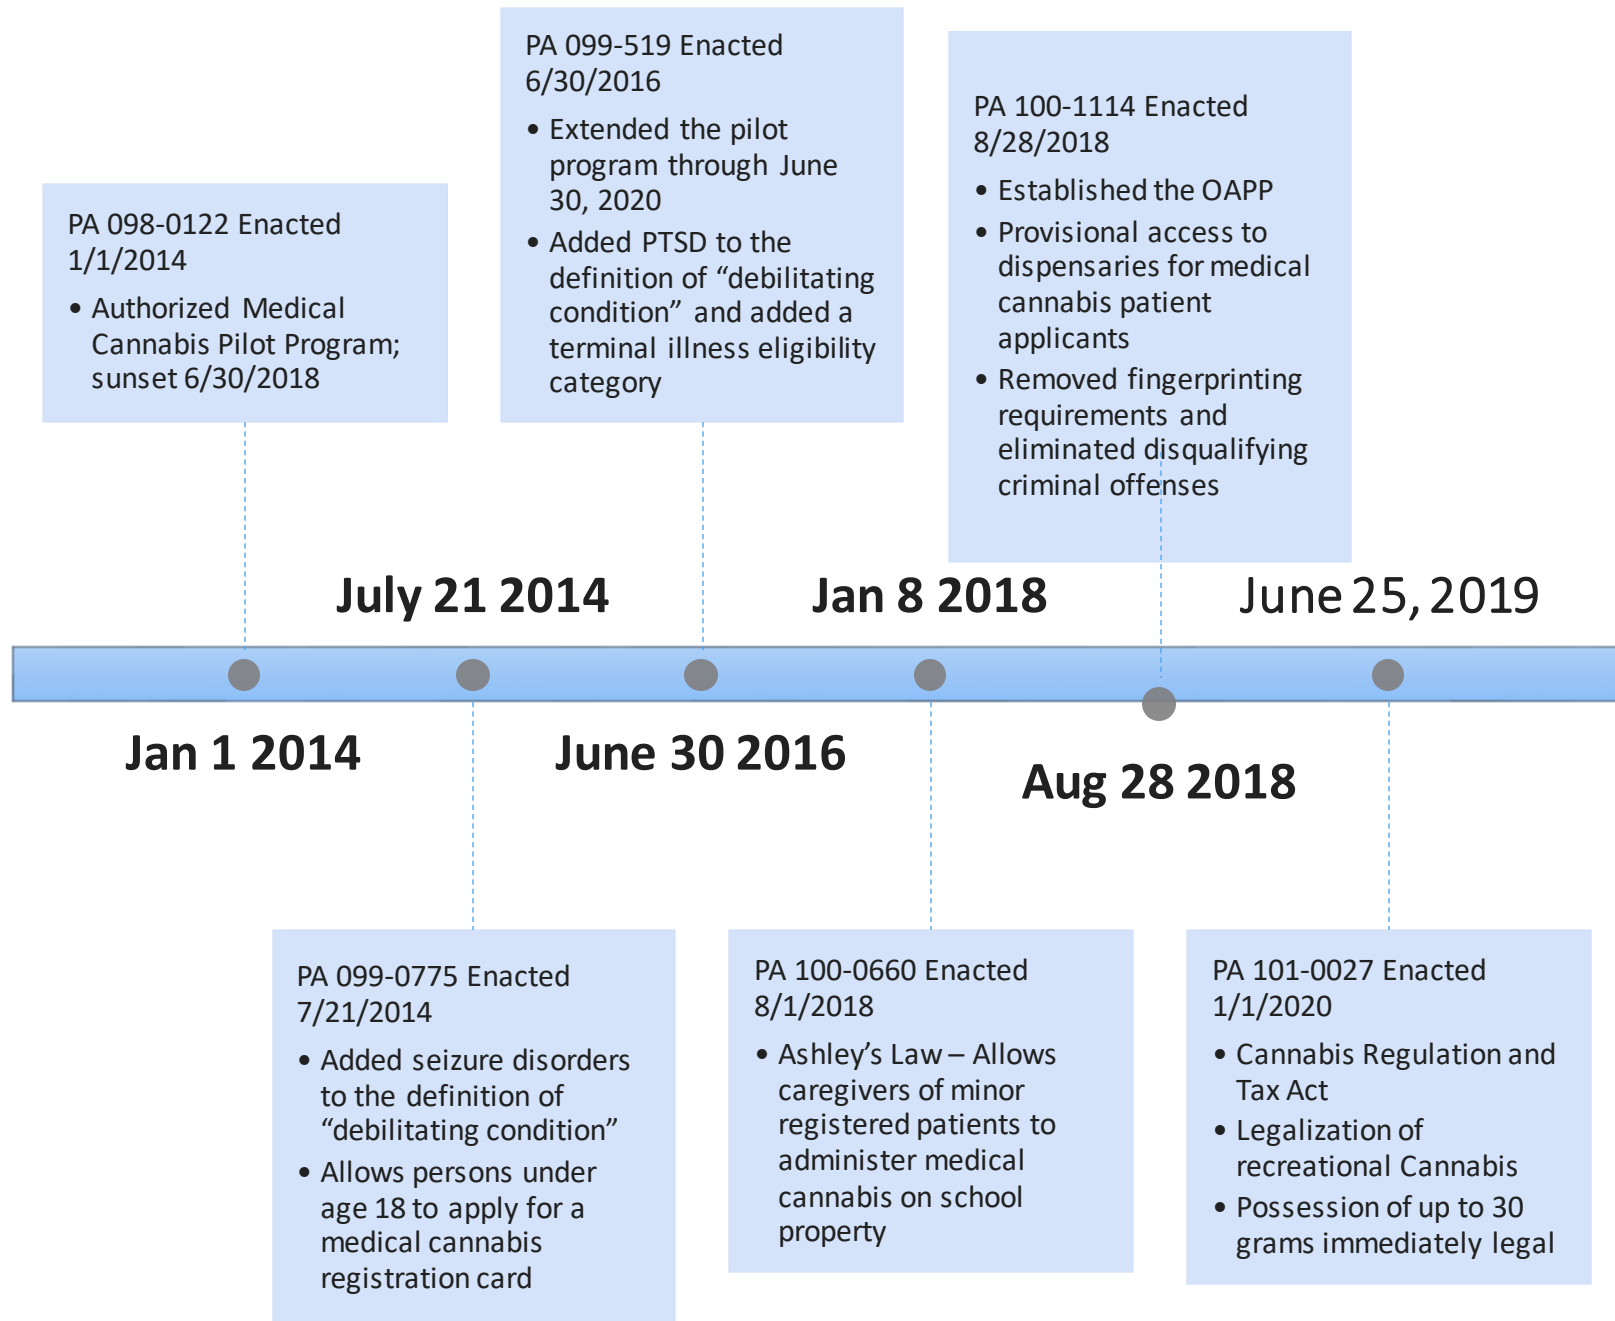

Illinois Compassionate Use of Medical Cannabis Pilot Program Act

In August 2013, Illinois became the 20th state to authorize a program for the cultivation and dispensing of cannabis for medical purposes

Illinois Compassionate Use of Medical Cannabis Pilot Program Act (effective 1/1/2014)- Initial pilot program to provide access to medical cannabis for qualifying patients

Currently 37 states; plus Washington DC, Puerto Rico, Guam, and US Virgin Islands have enacted medical cannabis legislation

History of Cannabis Legislation in Illinois

Opioid Alternative Pilot Program (OAPP)

Program Strategies

- Develop and implement systems and processes to enroll qualified Illinois adults into the OAPP
- Educate stakeholder groups (physicians, dispensaries, qualifying patients, local health departments, law enforcement) about OAPP
- Ensure quality and satisfaction of OAPP

Short-term Outcomes

- Increase in number of physicians who report an increase in knowledge and awareness about OAPP
- Increase in number of physicians who submit an OAPP PC for a qualifying patient

Intermediate Outcomes

- Increased knowledge and awareness about OAPP across all stakeholder groups
- Increased number of physicians who report awareness about OAPP and encourage qualifying patients to enroll in OAPP

Long-term Outcomes

- Decreased overdoses related to opioid prescription drugs

Opioid Alternative Pilot Program

General Provisions

Qualifying patients

- Patient has a current prescription for an opioid, OR patient could be prescribed an opioid based on generally accepted standards of care
- Must be 21 or older at the time of registration
- No caregiver provisions for OAPP
- Cannot have a Commercial Driver's License or School Bus Permit

OAPP Physician Certification is valid for 90-day registration period

Patient limited to 2.5 ounces of medical cannabis every 14-days.

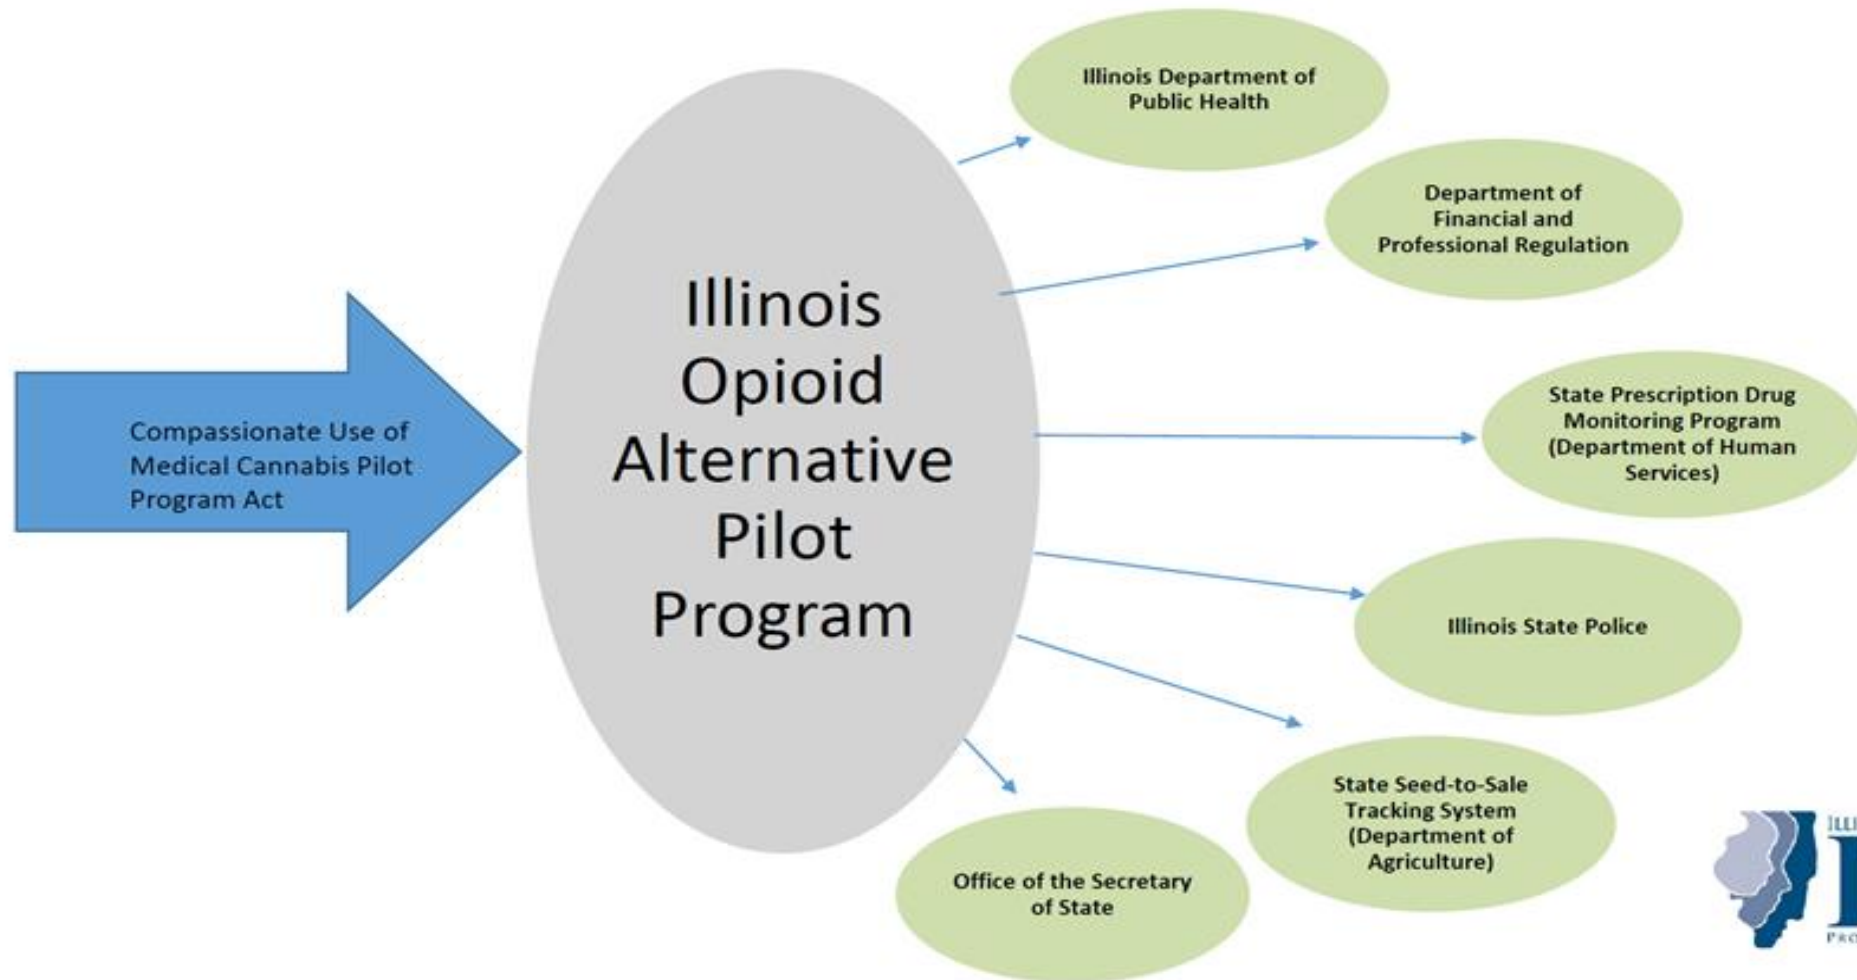

No dual registration in OAPP and MCPP

After 90-day registration period, qualifying patients can register again

Patients with a qualifying debilitating condition may apply for MCPP

Opioid Alternative Pilot Program

State Agency Partners

Opioid Alternative Pilot Program

Partners and Stakeholders

Licensed Prescribers

- Must be licensed to practice in Illinois and hold a valid Illinois Controlled Substances License at the time of issuing the Prescriber Certification

Licensed Dispensaries

- Sale of medical cannabis to registered patients

Certified Local Health Departments

- Qualifying patient may visit a LHD to register for OAPP
- Prescriber education about OAPP

Caregiver registrations are not accepted for the Opioid Alternative Pilot Program.

The use of mobile devices and some web browsers are not supported and may cause delays in registration. Please use a desktop computer or laptop as our system is not mobile compatible. Please direct all questions and concerns to dph.medicalcannabis@illinois.gov.

(410 ILCS 130/62)

Sec. 62.

Opioid Alternative Pilot Program

"Upon receipt of a written certification under the Opioid Alternative Pilot Program, the Department of Public Health shall electronically forward the patient's identification information to the Prescription Monitoring Program."

"For the purposes of patient care, the Prescription Monitoring Program shall make a notation on the person's prescription record stating that the person has a written certification under the Opioid Alternative Pilot Program and is a patient who is entitled to the lawful medical use of cannabis."

About Us

The Illinois Prescription Monitoring Program (ILPMP) is an electronic database that collects, tracks, and stores reported dispensing data on controlled substances in schedules II-V and selected drugs of interest, as well as other types of health information.

Healthcare providers can view 12 months of a patient's prescription history to assist with clinical decisions regarding prescribing and dispensing. Prescribers can also view a history of prescriptions dispensed under their DEA number.

Dispensers, prescribers and their designees can register for an account at ILPMP.org. The data in the ILPMP database is reported by pharmacies and other state departments. The ILPMP does not guarantee the complete accuracy of a patient's prescription history or other healthcare information as it is dependent on the information provided. If you notice an error in reporting, please [contact us](#).

The ILPMP is overseen by the Illinois Department of Human Services and was authorized by the Illinois Controlled Substances Act (720 ILCS 570/316) and strictly adheres to HIPAA and all access, disclosure and confidentiality provisions of Illinois Law.

A medical-themed background featuring a stethoscope, a blue pen, and a medical chart with a grid and text. The text on the chart includes 'ZAKAZIVANJE TERMIJA ZA PACIJENTA' and 'POS'.

- Includes all patients from that prescriber from in the last 12 months who have an active medical cannabis card
- Only shows the availability to purchase medical cannabis but does not provide any information about the actual dispensing
- This might prompt you to discuss the risks vs benefits of utilizing medical cannabis with other controlled substances

Benefits to Medical Cannabis

Tax incentives

Higher dosing availability

Higher possession limits

Future Research & Analysis

Phase 1

- Aggregate Opioid and Benzodiazepine dispensing data
- Opioid Overdose Data
- Correlation with Medical Cannabis registration
- Recreational Cannabis Legalization

Phase 2

- Future opportunity for patient linkage
- Medical Cannabis dispensing
- Controlled Substance dispensing
- Recreational dispensing
- Overdose data
